

SCALE = $\frac{1}{4}$ " = 1'-0"

NAME:

Instructions:

- Create a set of elevations on the 11"x17" template sheet provided.
- You will need to use your Architect's scale to find the dimensions on this sheet.
- Those dimensions will be used in order to create the elevation views.
- The details below will help to provide any missing dimensions we may not see from a floor plan view.
- All window and door heights will reach a measurement of 7'-0".
- All windows will be 4'-0" tall.
- Ceiling Heights will be 8'-0" tall.
- The roof peak will be located at the center of the shorter walls located on the left and right side of the floor plan. The roof peak will extend 4'-0" to the top of the ridge.
- Please extend the roof 1'-0" past the wall and add a 0'-8" fascia board to the roof.
- Add 4" trim boards around the windows and doors to give it a finished look.
- Feel free to personalize your building with additional details to show wall finishes (brick, siding, etc), roof finishes, or even color.
